Re update firmware E camera with ML Mac

5^{ws} 00 00 pm connect to WiFi

I get a weird screen I never saw before

~~Enter~~ IT said worst case!

I click on "Dashboard" GOT The usual page! Good.

2 min I did the "Fully on" power

8⁰⁰ } download config files "CEFC-2142-20220530.nml"
3⁰⁵ }

17⁰⁰ start update

17⁴⁴ 50%

50 "by the way" config

18²¹ Spinning wheel starts

49 WiFi drops off (light gray)

28⁰⁰ Still spinning wheel, (w/ light gray WiFi)

50 click on "Dashboard" it runs blue

29⁰⁵ Screen changes to Dashboard!

35⁰⁰ start downloading log files from File Explorer

39¹⁵ Log files downloaded "CEFC-19"

43¹⁵ WiFi connection dropped (light gray)

Now it is Not Selectable,

in here
I checked
to sleep
Sleep,
I recommend you
do it AFTER
get the log files
