

5/28/22 update firmware

East Can

dl config file "ccfc 2142 20220528"

changed power to "always on"

5 o'clock (why just prior to 1:50 pm)

I started the firmware upload

2:15 p STM spring wheel!

2:26 still spring (curator still there)

2:28 p best

4:20 p back suspended stills spring, Wi-Fi's hours having an issue. "not connect, connection available"

back on Wi-Fi (we have correct firmware)

4:30 set config files "..."

4:38 download 2 log files (7:00 best)

battery ran out "..."

from PM TC with Michael

of 10 for reboot etc

Can better hrs LED's

held 2 10 sec

has had reboot

takes 10 min

unplug power 3 w fork

then replug

hold LED's while power

rapid flash - w/ red light

Switch to mac from Reed

ccfc. log 5/28

ccfc. log1 5/23

downloaded today's pics

ccfc-zp-4

5:19 put to deep sleep
