

5/29/22

At AAWOI parked on road.

To update West CFC firmware
with my M1 Apple computer

1000 AM Local Time

download catlog the

15 secs or so

to jump fully on

"CFC-241-20220529, xml"

10 07 ~~40~~

begin upload of firmware

09 20

stop

10 00

spinning wheel

10 30

begins

WiFi NW just got going for blue

13 09

WiFi NW just back to blue (reconnected
spinning wheel still it self)

10 13 24

— spinning wheel ends!

it settled back to Dashboard screen

I checked and the firmware has updated. !!

10 18 30

begin download 4 log files

10 29 30

done " " "

"CFC-241-4, download"

10 34

back to deep sleep. saved

10 42

no WiFi available

Later TC w/ Michael

I did not turn the WiFi to not automatic
for the above operation
